|------------------------------------|-------------------------------------------------------------------------|
| • <b>Languages:</b>                | Java, JavaScript, SQL, HTML5, CSS3                                      |
| • <b>Frameworks &amp; Library:</b> | Spring Boot, JSP, Bootstrap, Git, Postman, React.js                     |
| • <b>Concepts:</b>                 | OOP, RESTful APIs, MVC, DSA, Exception Handling, Error Debugging        |
| • <b>Databases:</b>                | MySQL, MongoDB (Beginner), SQL Query Optimization                       |
| • <b>Cloud/Integration:</b>        | Google Cloud Platform (Learning), Workday Integrations (Learning)       |
| • <b>Soft Skills:</b>              | Analytical Thinking, Problem Solving, Team Collaboration, Communication |

## Work Experience

### Software Developer Intern

**Seeree Services Pvt. Ltd. | Feb 2024 – Apr 2024**

- Developed internal web modules using Java, JSP, and Bootstrap, improving usability for users.
- Created and tested RESTful APIs, reducing bug reports by 25% using proper error handling and validations.
- Improved SQL query performance by 30% by rewriting inefficient joins and indexes.

## Projects

### AI-Powered Interview Readiness & Resume Analyzer Platform

[https://ashwinikumar76.github.io/Resume\\_Analyzer-Ai/](https://ashwinikumar76.github.io/Resume_Analyzer-Ai/)

- Designed and built responsive, user-friendly interfaces using React.js, inline CSS, and Bootstrap.
- Integrated frontend with Python-based AI APIs for real-time resume analysis and feedback.
- Implemented dynamic UI components to display resume scores, strengths, grammar feedback, and improvement tips

### Education Management System (EMS)

Full Stack Web App – Java, JSP, JSTL, MySQL, Bootstrap

- Developed role-based dashboards for Admin, Faculty, and Students to manage attendance and academic records.
- Implemented CRUD operations using JDBC and secure form handling techniques.
- Improved page load time by optimizing server-side logic and SQL queries.

## Additional Highlights

- Strong debugging skills in Java: handled multiple production issues during internship.
- Actively learning **Google Cloud Platform** and **Workday integrations** to match enterprise needs.
- Wrote JUnit tests for major services and APIs.
- Quick learner: Willing to adopt client-specific tools and frameworks as required.
